Research Interests

I work on formal verification for systems software. In my research I develop **realistic, performant systems**, specify their intended behavior, then prove that the implementation always meet the specification. My PhD research culminated in a **verified, concurrent file system** with a proof that your data is safe if the computer suddenly reboots, and which gets good performance.

Education

2014–2022 (expected) **Ph.D. in Computer Science**, MIT, Cambridge, MA.
Verifying a concurrent, crash-safe file system with sequential reasoning

2014–2017 **M.S. in Computer Science**, GPA: 4.0/4.0, MIT, Cambridge, MA.
Verifying an I/O-concurrent file system

2010–2014 **B.S. in Electrical Engineering and Computer Science**, GPA: 3.97/4.0, University of Illinois, Urbana, IL.

Research Experiences

2014–present **Research assistant**, at MIT in the PDOS group.
advised by Frans Kaashoek, Nickolai Zeldovich, and Joseph Tassarotti
